# How to set up PPTP VPN on Android Lollipop

Follow the instructions step-by-step to set up PPTP VPN on Android Lollipop device.

1. Go to "Settings" (1).

2. Select "More" under "Wireless & Networks" (2).

3. Go to "VPN" (3).

4. Click on "+" sign to add a VPN profile (4).

5. In the "Name" field (5) enter desired name for your connection. We recommend to name it: VPN (PPTP).
Make sure "PPTP" is selected for the "Type" drop-down menu (6).
In the "Server address" field (7) enter the IP address.
Press the "Save" button (8).

If you want to connect you must follow these steps:

1. Go to "Settings" -> "More settings" -> "VPN".

2. Press the VPN connection you just created.

3. Enter your VPN username (9) and VPN password (10)

4. Once there is a small key-like icon on the left side of your notification bar, your PPTP VPN on Android Lollipop connection is created.

5. To end the VPN session click on the active VPN profile and click "Disconnect" (12).
