

1. Click on the “apple” on the upper left side of your screen and select “System Preferences” (1).

2. In System Preferences click on the Network icon. When the network screen is open, click on the “+” (2) icon in the lower left corner of the screen.

3. When the new windows opens select next options: For “Interface” (3) select VPN. For “VPN Type” (4) select PPTP. In the “Service name” (5) field type VPN. Click “Create” (6).

4. On the next screen do the following:
On “server address” field (7) type the IP address of the server you desire to connect to.

5. Select “Password” and type your VPN password (10).

6. On Network window click on “Advanced” button (11).

7. On “Options” tab (12) check the “Send all traffic over VPN connection” checkbox (13). Click “OK” (14). Your PPTP VPN on Mac OS connection is now created.
